

#### What Is Pure322?

Pure322 is an Organic Solvent and is considered to be the best alternative butane. Our solvent contains ZERO impurities and has no heavy metals. Pure322 is a liquified gas under pressure and is packaged in a can at 525ML.

#### Is It True That Pure322 Can Extract 100% Of A Trichome?

Yes! Our LDE has been scientifically proven to extract 100% of the trichome. Pure322 has the POWER to extract cellular water found in the trichome which butane can never achieve. This capability of Pure322 makes it much more effective to extract 100% of the Trichomes.

#### Is Pure322 comparable to N-Butane?

NO! Pure322 does NOT contain heavy metals, toxins or cancer carcinogens that butane does. Due to Pure322's higher effectiveness of trichome extraction it is impossible for N-Butane to ever achieve greater therapeutic and aromatic benefits.

#### Is Pure322 Flammable?

Yes! Pure322 is highly flammable and should NEVER be used

When you're seeking the best results, **come seek the experts**

**Our solvent has been proven scientifically to extract 100% of the trichome!**

- **High Trichome Recovery Process -**  
Our solvent has the ability to extract 100% of the Trichome's cellular water.
- **Mild Extraction Methods -**  
No HEAT purge needed to purify your botanical oils!
- **Zero Impurities -**  
No harmful toxins such as Arsenic, Barium, Lead, and Mercury.
- **Low Boiling Point -**  
With a boiling point of (-11°F) Compared to (34°F) with N-Butane.
- **Higher Yields -**  
Using LDE has been scientifically proven to produce higher yields.

Metavega has developed an Eco-Friendly Liquefied Dimethyl Ether (LDE) extraction process for the extraction of botanical oils. This extraction process does not compromise the authentic aromatic and therapeutic natural properties that everyone seeks. Using Pure322 to extract will give you much higher yields, increase your flavors, tastes and potency.
